Consultancy Services

Ventrus Consultancy Services deliver low risk solutions, ensuring network downtime is minimised. Our approach of future proofing your technology purchasing ensures you build strength and fault tolerance into the heart of your business systems.

"

Ventrus gives us peace of mind when it comes to servers, networks and security. They have allowed us to focus all of our technical resources on our own products and customers.

Dr Nigel Geary
Founder and President, Global BI Software Developer

IT Strategy

We will provide you with an insight into the current state of your IT infrastructure, allowing you to identify opportunities for efficiency, savings, value and growth.

Network Planning

Supporting you in all phases of your network project, we will analyse your business requirements and projected company growth to design a scalable, reliable and future proof network

Business Continuity

Receive a thorough analysis of your Business Continuity requirements and have it supported with a Business Continuity Plan (BCP) and supporting Systems Run-Book (SRB).

Security

Ensure your enterprise is secure by deploying our effective policies at desktop, server and internet level, including firewall solutions to protect from attacks.

Network Analysis

Our network analysis and troubleshooting services can alert you of changes, highlight heavy traffic generating nodes and show you where the bottlenecks reside on your network.

Ventrus also offer:

Support Services

We offer unlimited remote IT support and peace of mind to help your small-medium business remove the stress of IT related problems. Receive reliable and cost-effective IT Support solutions and optimisation when you need it and where you need it, 24/7 if necessary.

Server Monitoring

With our Real-Time Monitoring cloud-based service you will see real-time statistics for device performance, availability, trending analysis and even SLA adherence from third party providers. You will receive total visibility of your IT real-estate whether it is hosted locally, in the cloud, by us or in your own datacentre.

Managed Networks

It's not just about hardware and software; it's about understanding your business processes, your goals and your needs. We take responsibility for everything from cabling to complete asset management. Our clients rely on us to manage their infrastructure, benefitting from our professional advice from procurement, installation and dedicated IT support.
