## Managed Networks

It's not just about hardware and software; it's about understanding your business processes, your goals and your needs. We take responsibility for everything from cabling to complete asset management. Our clients rely on us to manage their infrastructure, benefitting from our professional advice from procurement, installation and dedicated IT support.

“

We trust Ventrus to manage all aspects of our network as well as host and monitor our critical services. We focus on what we do best and growing our business profitably.

**Richard Ingram**

Financial Director, Online Stationery Provider

## Change & Configuration Management

Our professional services provide access to skilled resources and change management processes, allowing you to reduce the risk change can have to your business.

## Installation

Our network design and implementation team will help you reduce the cost and risk to your business from the outset of any hardware or software installation.

## Network Integration

Our expert engineers are able to integrate systems across your IT real-estate and provide ongoing support, when and where you need them.

## Cabling

With over twenty years experience installing data and voice infrastructures, we provide a high quality and affordable network infrastructure to future proof your investment.

## Migration Planning & Deployment

We will work with you to understand the risk, cost of delivery and process involved in deploying an upgrade or migration of your IT systems, determining the impact this will have.

## IT Audit

Receive a free audit before handing over responsibility of support and management to us, containing a complete list of critical systems and their configuration.

## Asset Management

We can assist with all aspects of asset management to ensure you are compliant with licensing, renewals and up to date with your hardware vendor contracts.

## Ventrus also offer:

### Support Services

We offer unlimited remote IT support and peace of mind to help your small-medium business remove the stress of IT related problems. Receive reliable and cost-effective IT Support solutions and optimisation when you need it and where you need it, 24/7 if necessary.

### Server Monitoring

With our Real-Time Monitoring cloud-based service you will see real-time statistics for device performance, availability, trending analysis and even SLA adherence from third party providers. You will receive total visibility of your IT real-estate whether it is hosted locally, in the cloud, by us or in your own datacentre.

### Consultancy Services

Ventrus Consultancy Services deliver low risk solutions, ensuring network downtime is minimised. Our approach of future proofing your technology purchasing ensures you build strength and fault tolerance into the heart of your business systems.
